

Invasive Plant Strategy for British Columbia **Memorandum of Support**

The *Invasive Plant Strategy for British Columbia* is a collaborative outcome produced by a wide range of representatives from:

- All orders of government, including federal, provincial, local and First Nations;
- Land- and water-based user groups;
- Resource-based businesses and industries;
- Utilities; and
- Non-government organizations.

The strategy's goal is to build cooperation and coordination to protect British Columbia's environment and minimize negative social and economic impacts caused by the introduction, establishment and spread of invasive alien plants.

Signatories to this **Memorandum of Support** endorse the strategy's intent and thereby agree to uphold and espouse its goal. Signatories agree to participate in the Invasive Plant Council of British Columbia and help build leadership and a cooperative, province-wide invasive plant management program. Signatories are likewise expected to encourage other potential parties and individuals to work towards successful implementation of the strategy over time.

Nothing in this **Memorandum of Support** obligates signatories to contribute financially to the Invasive Plant Council of British Columbia or any aspect of the strategy's implementation.
